Here are some additional tips on getting the best measurements:

Stand up straight with both arms lifted and feet together

### Measuring Your Bust:

1. Take the tape around your back
2. Bring it across your bust at the fullest part
3. Record measurement

**Measuring Your Waist:**

1. Wrap the tape around your waist just above your belly button or naturally where you curve in when you bend side to side.
2. Record measurement

**Measuring Your Hips:**

1. Loop the tape completely around your bottom and thighs at the fullest part
2. Record measurement

Now that you have all three measurements, make sure you match them accordingly--bust-waist-hips. For example: 90-72-100

**Extra tips:**

- When measuring over underwear, keep the tape level and pull it together, but not too tight
- If you will be wearing special undergarments with your dress, measure over those
- If you are in between sizes, choose the larger one as it is easier to take in a dress than to let it out.
- And remember, every dress and every fabric fits differently, so sizing can vary with every dress.
